SKILLS

Frontend

- React
- React Native
- Tailwind CSS

Backend

- NestJS
- Express
- Python
- MongoDB
- GraphQL

Ops / Deployment

- Google Cloud
- Docker
- Kubernetes

WORK EXPERIENCE

Software Engineer II

Varadise Limited

Jan 2024 - Current

- Contributed as an early team member to Cosmos, a centralized SaaS management platform. Developed the frontend using React and MobX to support complex application workflows.
- Took significant ownership of a flexible, customizable form system powering the Digital Works Supervision System (DWSS). Designed and implemented the backend with NestJS and MongoDB to enable dynamic, customer-specific workflows.
- Revamped the form system powering DWSS, markedly improving its technical flexibility, performance, and long-term maintainability.
- Implemented an internal design system and component library, enhancing UI consistency and accelerating feature development across the team.
- Collaborated closely with designers and product managers through iterative feedback to deliver features aligned with design specifications and business objectives.

Software Engineer

Meego Technology Limited

Jun 2022 - Aug 2023

- Built and maintained an Ed-Tech web application using React, Express, and MongoDB, handling full-cycle software design, development, and testing.
- Migrated middleware from Feathers.js to GraphQL, translating existing logic into improved architecture and documentation.
- Deployed multiple applications with Google Cloud
- Set up data pipelines using Dagster and Airbyte.

EDUCATIONAL BACKGROUND

Bachelor of Physics

The Chinese University of Hong Kong

Sept 2018 - Jun 2022

- 2nd Honors Upper Division
- Minor in Computer Science
